LESSON 5.3 | Lesson notes

Reporting and Backup

Overview

Reports turn rows into answers: a query with GROUP BY can show loans per member, and ORDER BY with LIMIT can show the most borrowed books. Format the results clearly, with headings and aligned columns, before printing or saving them to a file. A database file is a single file, so a backup can be as simple as copying it, or using the connection's backup method while the program runs. Practise restoring from a backup at least once, because a backup you have never tested is only a hope.

Key points

- Part of: A Small Database Project
- About 20 minutes
- Try the example yourself, then check it

How to use this handout

1. Read the overview first, then work through the key points in order.
2. Write down anything you are unsure about and ask in the course forum.
3. Use page 2 to plan your practice and keep notes.

LESSON 5.3 | Lesson notes

Reporting and Backup

Practice checklist

- [ ] Read: Reporting and Backup
- [ ] Try the example from the lesson
- [ ] Explain the main idea in your own words
- [ ] Answer the related questions
- [ ] Ask about anything unclear in the forum
